They commit themselves to adopting as their own that ideal of loving brotherhood which can be realized only by the cessation of international differences, as they repudiate the duel as a means of sottling personal animostites. They accept as a corollary of the universal brotherhood of God the universal brotherhood of God the universal brotherhood of man. They send greetings to the women of other countries who this day may be assembled to attest similar convictions. They rejoice that women throughout the world are beginning to feel their responsibility for the human conditions outside of the home as well as within its sacred walls.
